

Celebrating a decade
of wireless telecom evolution

19.09.24

Crowne Plaza Brussels Airport,
Diegem, Belgium

Morning Session

9:00 Registration and coffee

We welcome all our guests. Time to register and pick up your badge. Enjoy some coffee and light snacks, as well as the opportunity to network.

09:45 Opening remarks and Venn Telecom highlights

Our CEO opens the day's events with highlights of 10 years of achievement and a short presentation on the company's growth and major milestones.

10:00 Keynote: Pierre-Gilles Dehaye, CEO.

Dive into a decade of wireless telecom evolution from 3G to 5G and beyond. Discover how Venn adapted and what's next. Explore groundbreaking advancements, the transformative impact of mobile tech, and the game-changing implications of mobile spectrum expansions.

10:45 Keynote: Martin Langmaid CTO, "Look Up."

Unveils how cutting-edge tech like LEO satellites is revolutionizing global telecom, complementing traditional ground solutions. Discover the evolution of access layer technologies—LEO, 5G, and more—and their transformative roles across sectors.

11:30: Coffee break

Time for some light refreshments and networking.

11:45: Panel Discussion: Frameworks of Connectivity

Explores network architecture beyond the access layer, such as MPLS, SASE, and SaaS. It examines industry-specific connectivity solutions and challenges in sectors like construction, fleets, and energy. The panel discusses trade-offs between network openness and cyber risks, with stakeholders sharing insights and experiences on adopting new technologies.

Panelists and moderator Martin Langmaid, CTO

12:40 - 13:45: Lunch: Walking lunch

Our walking lunch offers a variety of dishes and the opportunity to mingle and network in a relaxed atmosphere.

Afternoon

13:45 – 14:30 Round Table: An Interactive Q&A with Our Telecommunication Experts

Join us for a dynamic round table discussion, where you can ask our team about the future of connectivity and how it impacts you. Explore the criteria for choosing the best solutions, share your expectations, address potential challenges, and discover how our innovations can solve your connectivity issues.

14:30 – 17:00 Interactive and hands-on demonstrations. Q&A sessions answered by experts. Demonstrations take in an open space, simultaneously, with a coffee corner available for easy refreshments.

30 mins: Workshop 1: SpeedFusion evolution (Peplink) & bonding Starlinks

The latest developments in SpeedFusion and bonding technology.

Lead by: Martin Langmaid, CTO and Giedrius Montiejunas, Technical Program Manager from Peplink

30 mins: Workshop 2: Global infrastructure and the Venn Cloud

An in-depth look at the company's global infrastructure and the Venn Cloud, highlighting the technological benefits and the operational efficiencies available. This may include live demonstrations of data center failover processes.

Lead by: James Webster, Infrastructure Engineer Service Delivery

30 mins: Workshop 3: Enhancements in eSIM technology

We focus on upcoming enhancements in eSIM technology and the implications of this across various sectors.

Lead by: Maciej Rolecki, Associate Service Engineer

30 mins: Workshop 4: Tools and portals (Kenobi – Venn / InControl – Peplink)

An exploration of new tools, including features in InControl and Venn Portal and the differences between both, and the future of Starlink's portfolio.

Lead by: Sven Balis, Head of Operations

Closing Celebrations

17:00 - 17:15: Closing remarks

Some final thoughts on the day's events and interesting ideas raised.

17:00 – 20:00: Time for cocktails and mingling

Join us for a casual buffet and drinks session to celebrate this 10-year milestone.
